

CellFac® Multi-Layer Cell Culture System

Description

CellFac® 1-Layer Cell Culture System with Vent Caps, Non-Treated/Surface Treated

Purpose

Suitable for large-scale cell culture

Materials

Body: GPPS (General Polystyrene)

Cap: HDPE (High-density Polyethylene)

Color: Light green

Membrane: 0.22µm Hydrophobic PTFE (only use for Vent Cap)

Dimensions (Unit: mm)

Features

- Two 26mm diameter filling ports allow direct access to chamber bottom providing greater flexibility for sterile filling and emptying by pouring, pipetting or via tubing in a fully closed system
- Large opening design for easy pouring and aseptic filling
- Available in surface treated or non-treated
- Working volume: 130-200 mL
- Growth area: 656 cm²
- DNase/RNase free
- Non-pyrogenic
- Sterilized by irradiation SAL10⁶ (ISO11137)
- Shelf Life: 3 years after month of production
- Manufactured in a class 100,000 room environment
- Manufactured under ISO13485 and ISO9001 quality management system

Easy to Use

1 Pour the media directly into the Cell Culture System

2 Equilibrate by placing the Cell Culture System on the side with the small port

3 Turn 90° so the filling inlet is upward, the medium will be separated, with equal amounts in each chamber

4 Carefully tilt the Cell Culture System to a horizontal incubation position with the filling inlet up

5 Incubate following appropriate protocol

6 Loosen the cap and empty directly into the reservoir

CellFac® Multi-Layer Cell Culture System

Cat. No.	Description	Sterilization	Qty/Pk	Qty/Case
UCF010001	CellFac® 1-Layer Cell Culture System with Vent Caps, Non-Treated	Yes	1	8
UCF011001	CellFac® 1-Layer Cell Culture System with Vent Caps, Surface Treated	Yes	1	8

CellFac® Multi-Layer Cell Culture System

Description

CellFac® 2-Layer Cell Culture System with Vent Caps, Non-Treated/Surface Treated

Purpose

Suitable for large-scale cell culture

Materials

Body: GPPS (General Polystyrene)

Cap: HDPE (High-density Polyethylene)

Color: Light green

Membrane: 0.22µm Hydrophobic PTFE (only use for Vent Cap)

Dimensions (Unit: mm)

Features

- Two 26mm diameter filling ports allow direct access to chamber bottom providing greater flexibility for sterile filling and emptying by pouring, pipetting or via tubing in a fully closed system
- Large opening design for easy pouring and aseptic filling
- Available in surface treated or non-treated
- Working volume: 260-400 mL
- Growth area: 1296 cm²
- DNase/RNase free
- Non-pyrogenic
- Sterilized by irradiation SAL10⁶ (ISO11137)
- Shelf Life: 3 years after month of production
- Manufactured in a class 100,000 room environment

CellFac® Multi-Layer Cell Culture System

Description

CellFac® 5-Layer Cell Culture System with Vent Caps, Non-Treated/Surface Treated

Purpose

Suitable for large-scale cell culture

Materials

Body: GPPS (General Polystyrene)

Cap: HDPE (High-density Polyethylene)

Color: Light green

Membrane: 0.22µm Hydrophobic PTFE (only use for Vent Cap)
